

## **Mailmaster Mailbox Warranty on Commercial Mailboxes**

### **WORKMANSHIP AND CORROSION**

The Mailmaster Commercial Aluminium and Stainless Steel Series Mailboxes are warranted against defects caused by corrosion or faulty workmanship for a period of ten years. Mailmaster Stainless Steel Mailboxes are warranted against corrosion only based on the customer specifying or having selected the correct series stainless steel for the correct environmental application.

Under the warranty, Mailmaster may decide whether to repair or replace a defective mailbox and shall not be liable for the cost of removal and re – installation of the mailbox or for any consequential damages.

### **POWDER COATING / SURFACE FINISH**

A seven year warranty is applied to powder coating by the suppliers of the powder and the subsequent processors. Any claims for powder coating will be directed to the supplier and will be at their consideration. No assurance can be given as to the effect of ultraviolet impact and any atmospheric pollution which may diminish the appearance of the mailbox over time.

### **LOCKS**

One-year warranty is given on locking mechanisms. We use quality Australian made locks and find that in 95% of instances problems with locks are from the ingress of debris on installation, confusion of keys (keys are numbered to correspond to locks) or vandalism through attempted break in. In these instances a service charge will apply.

### **PRACTICAL APPLICATION**

Mailmaster representatives offer advice which complies with Australian Standards. In many instances this advice cannot, or will not be, accepted for reasons of ; space constraints, situation, aesthetics or other. Mailmaster provides detailed drawings or advice of what we will supply and the onus will remain with the purchaser.

This warranty is in addition to any warranties implied by Federal or State Laws.
